They say that I'm the only one alive in building three They say they've got the dream contained and now they've come for me</p> <p>Dreams can't hurt you, that's what parents used to say But they changed the world forever in New Mexico that day Someone else's dream can bite you, you imagine that you scream But the pain you feel is still just a dream, just a dream Yes the pain you feel is just a dream</p>
